QUALITY AS A STANDARD

Established since 1957 Transfluid is today a market leader in the field of industrial power transmission and associated components. Apart from often being required to find specific solutions to customers’ individual problems, we also have a complete range of standard products. The Transfluid product range includes:

- fluid and flex couplings
- variable speed drive
- clutches and brakes
- elastic couplings
- hybrid transmissions
- electric machines
- power shift transmissions
- power Take-Offs for marine and industrial engines
- torque control products

Quality is the main feature of the Transfluid product range and is achieved by:

- professional expertise supported by advanced technology
- precise monitoring and checking at each production stage
- final assembly checking and product testing prior to despatch to the customer

Transfluid involvement extends from first customer contact, to design and production, and through full field support.
**TRANSFLUID PRODUCTS**

**FLUID COUPLING**

**K & KX**
- Oil or water constant fill
- Up to 2500 kW

**KSL**
- Start up and variable speed drive
- Up to 4000 kW

**KPT**
- Start up and variable speed drive
- Up to 1700 kW

**KPTO**
- For internal combustion engine
- P.T.O. for pulley and cardan shaft
- Up to 1000 kW

**DISC AND DRUM BRAKE**

**NBG/TFDS**
- Up to 19000 Nm

**AIR AD HYDRAULIC CLUTCH**

**HYDRAULIC BRAKE**

**TPO-SHC-SL**
- Up to 16800 Nm
- Up to 2500 Nm
- Up to 9000 Nm

**OIL OPERATED POWER TAKE OFF**

**HF**
- Up to 1300 kW

**FLEXIBLE COUPLING**

**BM - B3M**
- Up to 33100 Nm

**MULTI PUMP DRIVE**

**stelladrive**
- Up to 1300 kW

**POWER SHIFT TRANSMISSION**
- With torque converter
- Up to three speeds
- Electric selector
- Up to 95 kW

**ELASTIC COUPLING**

**RBD**
- Up to 16800 Nm
- Up to 2500 Nm
- Up to 9000 Nm

**HYBRID MODULE & ELECTRIC MACHINE**
- For internal combustion engine
- Up to 1100 kW
- and 75 kW electric
