## Periodical assessment

For retention of the Tape Approval, a DNV surveyor shall perform a survey after 2,5 and 3 years and before the expiry date of this certificate to verify that the conditions of the approval are complied with.

The objective of the Periodical Assessment is to verify that the conditions for the Type Approval are not altered since the Type Approval certificate was issued. The main scope of the Periodical Assessment will normally include:

- Verification of the Type Approval applicant's production and quality system with regard to ensuring continued consistent production of the Type Approved products and the Type Approval applicant's own premises and at other companies that are given the responsibility for manufacturing of the products.
- Review of the Type Approval documentation and that this is still used as basis for the production
- Review of possible changes to the design, the material and the performance of the product
- Verification of the product marking.

## Other conditions

The approval does not cover the flexible coupling between engine and KPTU coupling.
